## Skills IV

### Exercise Book

## Topics:

3 digit addition

3 digit subtraction

Addition and subtraction from whole thousands

Multiplication of 2 digit numbers by 1 digit

Division with remainders

Puzzle activities

This workbook is made for students who have mastered the basic skills of addition, subtraction, multiplication and division.

The addition and subtraction exercises in this exercise book contain 3 and 4 digit numbers, and teach children how to subtract from whole hundreds and thousands. This is all about number bonds and enables kids to better estimate the outcomes.

The multiplication is based on multiplying double digit numbers by 1 digit and the division exercises contain remainders.

Based on most school curricula, this exercise book is suited for grade 3 students, but can also be used as remedial material for students in higher grades, or as challenging material for those in lower grade levels.

This exercise book comes with answers and is free for every one!
