## Playing video games

Name: $\qquad$

A group of friends played a video game. The table shows the number of points each student got.

| John | Peter | Maria | Sandra | Erik |
| :---: | :---: | :---: | :---: | :---: |
| 15,100 | 10,900 | 3,200 | 7,000 | 18,900 |

(1) Complete the bar graph (Estimate the height of the bars).

(2) How many points did they score altogether?
(3) Who had $2 \times 2 \times 2 d \times 5 \times 19$ point more than Maria?
(4) What was the average score?

## Answers

A group of friends played a video game. The table shows the number of points each student got.

| John | Peter | Maria | Sandra | Erik |
| :---: | :---: | :---: | :---: | :---: |
| 15,100 | 10,900 | 3,200 | 7,000 | 18,900 |

(1) Complete the bar graph (Estimate the height of the bars).

(2) How many points did they score altogether?

## 55,100 points

(3) Who had $2 \times 2 \times 2 d \times 5 \times 19$ point more than Maria?

## Sandra

(4) What was the average score?

11,020 points
