

# Gallons to Liters

Name: \_\_\_\_\_ Class: \_\_\_\_\_

Fill in the correct numbers.

Take 1 gallon = 3.79 liters and round your answers off to the nearest hundredth.

$$2 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.8 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$3 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$12 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$5 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$1.3 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.2 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$20 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$1.6 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.05 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.5 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$2.07 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

If 1 gallon = 3.79 liters, 1 liter equals  $1/3.79 = 0.2638$  gallons!

$$10 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$2.5 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$100 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$23.4 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$200 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$40 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$300 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$20.2 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$340 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$35 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$250 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$190 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

# Answers

Fill in the correct numbers.

Take 1 gallon = 3.79 liters and round your answers off to the nearest hundredth.

$$2 \text{ gallons} = \boxed{7.58} \text{ liters}$$

$$0.8 \text{ gallons} = \boxed{3.03} \text{ liters}$$

$$3 \text{ gallons} = \boxed{11.37} \text{ liters}$$

$$12 \text{ gallons} = \boxed{45.48} \text{ liters}$$

$$5 \text{ gallons} = \boxed{18.95} \text{ liters}$$

$$1.3 \text{ gallons} = \boxed{4.93} \text{ liters}$$

$$0.2 \text{ gallons} = \boxed{0.76} \text{ liters}$$

$$20 \text{ gallons} = \boxed{75.8} \text{ liters}$$

$$1.6 \text{ gallons} = \boxed{6.06} \text{ liters}$$

$$0.05 \text{ gallons} = \boxed{0.19} \text{ liters}$$

$$0.5 \text{ gallons} = \boxed{1.9} \text{ liters}$$

$$2.07 \text{ gallons} = \boxed{7.85} \text{ liters}$$

If 1 gallon = 3.79 liters, 1 liter equals  $1/3.79 = 0.2638$  gallons!

$$10 \text{ liters} = \boxed{2.64} \text{ gallons}$$

$$2.5 \text{ liters} = \boxed{0.66} \text{ gallons}$$

$$100 \text{ liters} = \boxed{26.39} \text{ gallons}$$

$$23.4 \text{ liters} = \boxed{6.17} \text{ gallons}$$

$$200 \text{ liters} = \boxed{52.77} \text{ gallons}$$

$$40 \text{ liters} = \boxed{10.55} \text{ gallons}$$

$$300 \text{ liters} = \boxed{79.16} \text{ gallons}$$

$$20.2 \text{ liters} = \boxed{5.33} \text{ gallons}$$

$$340 \text{ liters} = \boxed{89.71} \text{ gallons}$$

$$35 \text{ liters} = \boxed{9.23} \text{ gallons}$$

$$250 \text{ liters} = \boxed{65.96} \text{ gallons}$$

$$190 \text{ liters} = \boxed{50.13} \text{ gallons}$$
