

# Gallons to Liters

Name: \_\_\_\_\_ Class: \_\_\_\_\_

Fill in the correct numbers.

Take 1 gallon = 3.79 liters and round your answers off to the nearest hundredth.

$$4 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.3 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$6 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$14 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$7 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$1.6 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.5 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$30 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$1.1 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.06 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$0.8 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

$$3.05 \text{ gallons} = \boxed{\phantom{000}} \text{ liters}$$

If 1 gallon = 3.79 liters, 1 liter equals  $1/3.79 = 0.2638$  gallons!

$$20 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$1.5 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$300 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$10.4 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$400 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$50 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$600 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$30.6 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$180 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$25 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$290 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

$$130 \text{ liters} = \boxed{\phantom{000}} \text{ gallons}$$

# Answers

Fill in the correct numbers.

Take 1 gallon = 3.79 liters and round your answers off to the nearest hundredth.

$$4 \text{ gallons} = \boxed{15.16} \text{ liters}$$

$$0.3 \text{ gallons} = \boxed{1.14} \text{ liters}$$

$$6 \text{ gallons} = \boxed{22.74} \text{ liters}$$

$$14 \text{ gallons} = \boxed{53.06} \text{ liters}$$

$$7 \text{ gallons} = \boxed{26.53} \text{ liters}$$

$$1.6 \text{ gallons} = \boxed{6.06} \text{ liters}$$

$$0.5 \text{ gallons} = \boxed{1.9} \text{ liters}$$

$$30 \text{ gallons} = \boxed{113.7} \text{ liters}$$

$$1.1 \text{ gallons} = \boxed{4.17} \text{ liters}$$

$$0.06 \text{ gallons} = \boxed{0.23} \text{ liters}$$

$$0.8 \text{ gallons} = \boxed{3.03} \text{ liters}$$

$$3.05 \text{ gallons} = \boxed{11.56} \text{ liters}$$

If 1 gallon = 3.79 liters, 1 liter equals  $1/3.79 = 0.2638$  gallons!

$$20 \text{ liters} = \boxed{5.28} \text{ gallons}$$

$$1.5 \text{ liters} = \boxed{0.4} \text{ gallons}$$

$$300 \text{ liters} = \boxed{79.16} \text{ gallons}$$

$$10.4 \text{ liters} = \boxed{2.74} \text{ gallons}$$

$$400 \text{ liters} = \boxed{105.54} \text{ gallons}$$

$$50 \text{ liters} = \boxed{13.19} \text{ gallons}$$

$$600 \text{ liters} = \boxed{158.31} \text{ gallons}$$

$$30.6 \text{ liters} = \boxed{8.07} \text{ gallons}$$

$$180 \text{ liters} = \boxed{47.49} \text{ gallons}$$

$$25 \text{ liters} = \boxed{6.6} \text{ gallons}$$

$$290 \text{ liters} = \boxed{76.52} \text{ gallons}$$

$$130 \text{ liters} = \boxed{34.3} \text{ gallons}$$
