

Angles in Parallelogram

Name: _____ Class: _____

Find the value of the angles in each parallelogram (not drawn to scale)

EFGH is a parallelogram

$\angle a = \underline{\hspace{2cm}}$

ABCD is a parallelogram

$\angle b = \underline{\hspace{2cm}}$

FGHI is a parallelogram

$\angle c = \underline{\hspace{2cm}}$

NOPQ is a parallelogram

$\angle d = \underline{\hspace{2cm}}$

STUV is a parallelogram

$\angle e = \underline{\hspace{2cm}}$

CDEF is a parallelogram

$\angle f = \underline{\hspace{2cm}}$

Answers

Find the value of the angles in each parallelogram (not drawn to scale)

EFGH is a parallelogram

$$\angle a = \underline{92^\circ}$$

ABCD is a parallelogram

$$\angle b = \underline{40^\circ}$$

FGHI is a parallelogram

$$\angle c = \underline{72^\circ}$$

NOPQ is a parallelogram

$$\angle d = \underline{35^\circ}$$

STUV is a parallelogram

$$\angle e = \underline{37^\circ}$$

CDEF is a parallelogram

$$\angle f = \underline{70^\circ}$$
