Answers

Solve the integer addition and subtraction problems

$$-10 - (-6) = -4 \quad 13 - (-6) = 19 \quad -16 - (-12) = -4$$

$$18 - (-2) = 20 \quad -15 + 16 = 1 \quad 19 + (-15) = 4$$

$$-20 + 15 = -5 \quad 15 - (-4) = 19 \quad -10 + (-10) = -20$$

$$-13 - (-10) = -3 \quad -14 - 4 = -18 \quad -6 - (-20) = 14$$

$$18 + (-17) = -1 \quad -17 - (-20) = 3 \quad -11 - 5 = -16$$

$$-12 - 5 = -17 \quad -20 - (-10) = -10 \quad -6 - (-20) = 14$$

$$-4 + 14 = 10 \quad -12 - 5 = -17 \quad -11 + 10 = -1$$

$$12 - (-3) = 15 \quad -12 - (-10) = -2 \quad -20 - (-9) = -11$$

$$-16 - 2 = -18 \quad 17 + (-4) = 13 \quad -12 + 10 = -2$$
